Vocational education and training 11
Federal vocational baccalaureate 16
Professional education 18
Vocational qualifications for adults 22
Swiss VPET funding 23
VPET at international level 26
VPET research 28
The Swiss VPET system enables young people to enter the labour market and ensures that there are enough skilled workers and managers in the future. It has a high labour market relevance and is an integral part of the education system. The VPET system is divided into two sectors: upper-secondary level vocational education and training (VET) and tertiary-level professional education.

The most popular form of upper-secondary level education and training
Two-thirds of all young people coming out of compulsory education in Switzerland enrol in vocational education and training (VET), which provides them with a solid foundation in a given occupation. There are around 230 occupations to choose from. The VET sector forms the basis for lifelong learning and opens up a wealth of job prospects.

Career prospects
Tertiary-level professional education builds from upper-secondary level vocational education and training (VET). It provides professionals with specific competences and prepares them for highly technical and managerial positions. There are around 400 federal examinations as well as 57 study programmes at colleges of higher education in 8 different professional fields. The Federal Vocational Baccalaureate (FVB) opens the way to Swiss universities of applied sciences (UAS). FVB holders who pass the University Aptitude Test (UAT) have the option of enrolling in a cantonal university or one of Switzerland’s two federal institutes of technology (FIT).

Dual-track approach to learning
Most VET programmes are of the dual-track variety (i.e. part-time classroom instruction at a vocational school combined with a part-time apprenticeship at a host company). The less common variety is a school-based VET programme (i.e. full-time classroom instruction, no apprenticeship). School-based VET programmes are generally offered by trade schools or commercial schools. Tertiary-level professional education also combines classroom instruction with work-based training, thereby ensuring a smooth transition from dual-track VET programmes.

Permeability
The Swiss VPET system is based on clearly defined education and training options as well as on national qualifications procedures. Typically, VET and professional education are very flexible: learners may pursue more advanced education and training opportunities, switch from vocational/professional pathways to general education/university pathways and later change the course of their working lives with relative ease. Continuing education and training (CET) options are also available at all levels.

Labour-market focus
Education and training are centred on acquisition of professional competences that are actually in demand as well as on occupations and professions for which there are existing job vacancies. This direct link with the labour market is the main reason why Switzerland has one of the lowest youth unemployment rates in Europe.

Collective governance
The VPET system is collectively governed by the Confederation, the cantons and professional organisations. These three main partners work together to maintain a high level of quality within the VPET system. They also strive to ensure that there is an adequate supply of apprenticeship/traineeship positions and training options. This partnership and respective areas of responsibility are set forth in the Federal Vocational and Professional Education and Training Act (VPETA) and its corresponding ordinance.
Quality
The main purpose of having all three partners involved is to ensure high quality within the VPET system. The distribution of training content across two (or in some cases three) different learning locations – i.e. vocational schools, host companies and branch training centres – helps to improve the quality of upper-secondary level VET programmes. The responsibilities of each actor depend on the tasks assigned to each of the three main partners within the VPET system. In areas where responsibilities overlap, the actors work together on the specific situations and matters at hand.
⇒ More information on pages 8–9.

Efficiency
The consistent focus on the labour market allows VET programmes to be efficiently and effectively organised. One indication of this is the fact that the productive output of learners during their apprenticeships exceeds the gross costs of their training.
⇒ More information on pages 23–25.

1 Federal Statistical Office (2016a). These figures refer to the number of qualifications awarded, not the number of holders (some of whom may hold several qualifications).
Swiss VPET system

Vocational education and training (VET) is provided at upper-secondary level. Professional education is provided at tertiary level. Both VET and professional education use clearly defined curricula and national qualification procedures. They are also characterised by a high degree of permeability: recognition of prior learning to keep track of prior education and training makes it much easier for learners to pursue further education and training opportunities, switch between vocational/professional pathways and general education/university pathways and change the course of their working lives. The Swiss VPET system offers a broad selection of available training options. Courses cater to different abilities and are geared to the needs of different age groups. A wealth of job-related continuing education and training (CET) courses can also be found at all levels.
Upper-secondary level: vocational education and training (VET)
VET programmes provide learners with solid professional competences and pave the way for lifelong learning.
⇒ More information on pages 11–17.

3-year or 4-year VET programmes for the Federal VET Diploma
These VET programmes provide learners with the competences needed to work in a specific occupation and open access to tertiary-level professional education. Learners also have the option of preparing for the Federal Vocational Baccalaureate (FVB) either during their training or after graduation.

2-year VET programmes for the Federal VET Certificate
These VET programmes provide young people with more practical skills to obtain a recognised qualification for a specific occupational profile. Graduates of a 2-year VET programme may enrol directly in a 3- or 4-year VET programme leading to the Federal VET Diploma.

Federal Vocational Baccalaureate (FVB)
Learners enrolled in a 3-year or 4-year VET programme for the Federal VET Diploma have the option of preparing for the Federal Vocational Baccalaureate (FVB). This preparatory course covers general education subjects and those who pass the FVB examination may enrol in a Swiss university of applied sciences (UAS) without having to take an entrance examination. Moreover, holders of the FVB can prepare for the University Aptitude Test (UAT), which opens the way for enrolment in a cantonal university or federal institute of technology.

Transitional options between lower- and upper-secondary level
Transitional options are available to young people completing compulsory education who have been unable to immediately transition to upper-secondary level. Such options include practical training and pre-apprenticeships and are generally designed to prepare young people for enrolment in VET programmes.

Tertiary level: professional education
Holders of the Federal VET Diploma or equivalent qualifications may specialise or deepen their expertise at tertiary level by pursuing a professional qualification. Preparation also includes acquisition of managerial skills. The professional education sector is designed to meet the needs of the labour market and builds on existing work experience.
⇒ More information on pages 18–21.

Federal examinations (level 1)
This federal examination is intended for professionals who wish to improve their knowledge and skills and specialise in a given field after completing upper-secondary level vocational education and training (VET). Successful candidates are awarded the Federal Diploma of Higher Education, which is generally a prerequisite for admittance to the examination for the Advanced Federal Diploma of Higher Education.

Federal examinations (level 2)
This examination is generally for professionals who have acquired a great deal of expertise in their field and/or who intend to hold a managerial position in a company. Successful candidates are awarded the Advanced Federal Diploma of Higher Education.

Study programmes at colleges of higher education
Study programmes at colleges of higher education are intended for professionals holding a Federal VET Diploma or equivalent qualifications who wish to improve their knowledge and skills and hold managerial positions. These degree programmes cover a broader and more general range of topics than those addressed in the two federal examinations described above. Successful candidates are awarded a federally recognised qualification.

Job-related continuing education and training (CET)
A wide range of job-related CET options (i.e. non-formal courses, seminars, etc.) can be found at all training levels and are part of lifelong learning.
One mission – three partners

The provision of VET and professional education is a mission collectively shouldered by the Confederation, the cantons and professional organisations. These three partners are jointly committed to the highest possible standard of quality within the Swiss VPET system. They also strive to ensure the availability of an adequate number of apprenticeships and training courses.

Confederation
State Secretariat for Education, Research and Innovation (SERI)
Is the federal government’s specialised agency for national and international matters concerning education, research and innovation policy. SERI is responsible for regulating and co-funding the VET and professional education sectors.
☞ www.sbfi.admin.ch

Swiss Federal Institute for Vocational Education and Training (SFIVET)
Mainly provides basic and continuing training to teachers, trainers, instructors and examiners working at both upper-secondary level (VET sector) and tertiary level (professional education sector). SFIVET is also involved in research, studies, pilot projects and the provision of services. It has three regional campuses: in Lausanne, Lugano and Zollikofen.
☞ www.ehb-schweiz.ch

Confederation
Strategic management and development
• Quality assurance and further development of the Swiss VPET system
• Comparability and transparency of courses throughout Switzerland
• Enactment of around 230 VET ordinances
• Recognition of regulations for around 400 federal examinations as well as 35 core syllabuses for study programmes at colleges of higher education
• Recognition of study programmes and continuing education and training at colleges of higher education
• Recognition of training courses for teachers, trainers, instructors and examiners within the VET and professional education sectors as well as training courses for vocational, educational and career guidance counsellors
• Recognition of foreign qualifications
• Payment of one-fourth of public sector expenditure for the VPET system
• Promotion of innovation and support for specific activities in the public interest
Professional organisations

Trade associations / branch organisations
Determine content of training and national qualification procedures, organise courses at upper-secondary level (VET sector) and tertiary level (professional education sector).

Social partners, other relevant organisations and VPET providers
Together with trade associations, they are also involved in the further development of VPET.

Companies
Where possible, companies provide apprenticeships and traineeships, thereby paving the way for the next generation of qualified workers. Their involvement in the Swiss VPET system is voluntary.

Cantons

Swiss Conference of Cantonal Ministers of Education (EDK)
The cantons are generally responsible for education and training in Switzerland. National cooperation through EDK complements and reinforces cantonal authority over education. ⇒ www.edk.ch

26 cantonal VPET offices
Responsible for implementing VET at cantonal level, VET offices coordinate their activities through the Swiss Conference of VET Offices (SBBK), a specialised conference of the Swiss Conference of Cantonal Ministers of Education (EDK).
⇒ www.sbbk.ch

Vocational, educational and career guidance services
Provide information and advice to both young people and adults.

Professional organisations

Training content and apprenticeships
- Establishing the training content of VET programmes and study programmes at colleges of higher education
- Establishing national qualification procedures for VET programmes as well as for federal examinations for the Federal Diploma of Higher Education and the Advanced Federal Diploma of Higher Education
- Creation of apprenticeship positions
- Imparting professional competences at tertiary level (professional education)
- Developing new training courses
- Organising branch courses
- Managing VPET funds

Cantons

Implementation and supervision
- Implementing the Federal Vocational and Professional Education and Training Act (VPETA)
- Supervising apprenticeships, vocational schools and colleges of higher education
- Providing vocational, educational and career guidance services
- Creating options that prepare young people for enrolment in VET programmes
- Issuing permits authorising host companies to take on apprentices and/or trainees
- Apprenticeship marketing
- Providing training to apprenticeship trainers in host companies

Vocational schools
Vocational schools provide classroom instruction for both dual-track (i.e. combined work and school) and school-based (i.e. full-time classroom instruction, no apprenticeship) VET programmes. They also prepare learners for the Federal Vocational Baccalaureate examination.
Learning locations

The trademark and strength of the Swiss VPET system is the direct correlation with the labour market. This is reflected in various learning locations.

Upper-secondary level: Vocational education and training (VET)

Apprenticeship training at host companies
With the dual-track approach, learners attend courses at vocational schools on a part-time basis. The remaining time is spent doing an apprenticeship at a host company where they are provided with the practical know-how, knowledge and skills needed for their chosen occupation. Learners also actively take part in the host company’s production processes. Host company networks: in some cases, host companies may wish to combine their strengths to offer one or more apprenticeships in a modular format.

Classroom instruction at vocational schools
Vocational schools provide classroom instruction. This consists of instruction in vocational subjects as well as subjects falling under the Language, Communication and Society (LCS) category. Classroom instruction is intended to develop technical, methodological and social skills of learners while imparting the theoretical and general principles needed to perform occupational tasks. Classroom instruction covers one or two days per week. Vocational schools also offer a preparatory course for the Federal Vocational Baccalaureate Examination.

Branch courses at branch training centres
Branch courses are meant to complement classroom instruction at vocational schools and apprenticeship training at host companies by providing learners with essential practical skills. Branch courses often take place at third-party training centres run by the branches involved.

Tertiary level: Professional education

Preparation for federal examinations
Preparation for federal examinations for the Federal Diploma of Higher Education and Advanced Federal Diploma of Higher Education takes place alongside one’s usual working activities. Although there is no requirement to do so, candidates for federal examinations may enrol in part-time preparatory courses, which are offered by public and private providers in the evenings or at weekends.

Study programmes at colleges of higher education
Study programmes at colleges of higher education may be attended on either a full-time or part-time basis. Students enrolled in the full-time programme will complete a traineeship over the course of their studies. In order to enrol part-time, students must be employed at least 50% of a standard workweek. The aim is to apply what one learns in an actual working environment.
Vocational education and training

Vocational education and training provides young people with their first exposure to working life. It is the basis for lifelong learning and opens a wide range of career prospects.

Enrolment in upper-secondary level in 2014

Around two-thirds of young people coming out of compulsory education in Switzerland enrol in an upper-secondary level VET programme. This proportion has remained constant for years. Dual-track VET programmes are by far the most prevalent form of vocational education and training. In the French- and Italian-speaking regions of Switzerland, however, there is a marked preference for school-based VET programmes compared to the German-speaking region: in 2014, only 4.0% of all VET programmes compared to the German-speaking region were school-based whereas in the French-speaking region the proportion stood at 24.4% and in the Italian-speaking region at 29.9%.

Transitions from lower- to upper-secondary level

The vast majority of pupils coming out of compulsory education, enrol in either a vocational school (VET sector) or in a baccalaureate school or a specialised school (general education sector). Many young people who were unable to transition directly to upper-secondary level opted for a transitional option such as a 10th school year or a preparatory course for VET. Others went on a motivation semester or spent time abroad to improve their language skills.

---

4 Federal Statistical Office (2016c), (2016d). VET, incl. non-formal two year apprenticeships. General education includes baccalaureate schools, specialised schools and schools that prepare learners for the specialised baccalaureate. Transitional options include the 10th school year, preapprenticeships and schools that prepare young people for enrolment in VET.
Apprenticeship market
There are two sides to the apprenticeship market: the supply side (host companies offering apprenticeship positions) and the demand side (young people looking for apprenticeship positions). The State plays a mediating role: it ensures the best possible general conditions for host companies, encourages the provision of apprenticeship positions and helps young people to choose an occupation company. Various factors influence supply and demand on the apprenticeship market. On the supply side are structural changes, economic fluctuations and the host company ratio (i.e. proportion of companies that are willing and able to train apprentices). On the demand side, demographic changes and the interests of young people have an impact on the apprenticeship market.

Apprenticeship «Barometer»
The Apprenticeship «Barometer» is a survey conducted twice each year (once in April and once in August) to determine the current situation and short-term trends on the apprenticeship market. Representative surveys are conducted among companies and young people to identify and monitor key indicators of the present situation.

⇒ www.sbfi.admin.ch/barometer

Structural changes
The supply of apprenticeship positions reflects the long-term needs of the labour market.

Economic fluctuations
Economic fluctuations affect the order book of host companies and therefore their ability to productively employ apprentices.

Host company ratio
Around 40% of the companies in Switzerland that could offer apprenticeships actually do so. Smaller companies in particular are either overly specialised or lack qualified apprenticeship trainers, which makes it more difficult for them to offer apprenticeships.

Demographic changes
Demographic changes affect the number of young people completing compulsory education, which in turn affects demand.

Interests of young people
The choice of occupation depends on the hopes, aspirations and aptitudes of learners as well as the availability of suitable apprenticeship positions. Career guidance services provide young people with information and advice.
Focus on young people: Advice and support before and during training

Vocational information and counselling
Cantonal career guidance services work closely with schools to help young people choose an occupation and find a suitable apprenticeship.
🌐 www.adressen.sdbb.ch

List of apprenticeship positions
The list of apprenticeship positions enables young people to search all open apprenticeships by occupation and canton.
🌐 www.berufsberatung.ch ⇒ Lehrstellensuche

Transitional options
Transitional options are intended for young people who are not yet able to enrol in a VET programme for social or scholastic reasons or who have been unable to find an apprenticeship. In addition to courses aimed at improving scholastic, linguistic or other skills, young people attend a course to prepare them for enrolment in a VET programme. The acquired skills increase their chances of finding an apprenticeship.

Coaching and mentoring
Coaching and mentoring entails the provision of individual guidance to young people during the period of compulsory education. One of the aims is to help young people to improve occupational and social skills and optimise their CVs. The various projects and programmes are sponsored by both the cantons and private organisations.

VET Case Management
VET Case Management is intended to help young people, who are particularly at risk of dropping out of VET programmes. The aim is also to improve the efficiency and effectiveness of measures taken. VET Case Management is a structured process: a case manager coordinates institutional activities in accordance with an established plan so as to ensure that the young person receives adequate support.
🌐 www.sbfi.admin.ch/cmbb

Apprenticeship placement services
Apprenticeship placement services are available to young people in the fourth quarter of the last year of lower-secondary school. The aim is to further assist young people in their efforts to find an apprenticeship position.

Individual guidance
Individual guidance is for young people who encounter learning difficulties. They receive comprehensive support involving the host company, the vocational school, the branch training centre and social surroundings. Learners enrolled in two-year programmes are legally entitled to individual support and guidance. However, learners enrolled in three- or four-year VET programmes may also make use of these services.

Focus on companies: creation of apprenticeship positions

Host company networks
The creation of host company networks enables small-sized or specialised companies to pool their resources together as a network or with other companies. Instead of providing the full range of apprenticeship training as a single company, each partner provides a portion thereof.
🌐 www.lbv.berufsbildung.ch

Marketing of apprenticeship positions
Cantonal VPET offices are familiar with the conditions in the various regions. They maintain contact with local companies. Apprenticeship promoters contact companies directly to encourage them to create apprenticeship positions and become involved in training apprentices.
In Switzerland, there are VET programmes for around 230 different occupations. The ten most popular occupations in 2015 account for over 50% of all newly signed apprenticeship contracts.

The choice of occupation and search for an available apprenticeship are important processes. Pupils begin this process during compulsory education when they are between the ages 13 and 16. Over 70% of all young people who enrolled in a VET programme in 2016 managed to find an apprenticeship that matched their desired occupation. This proportion has remained constant over the years.

### Apprentice satisfaction with choice of occupation

The choice of occupation and search for an available apprenticeship are important processes. Pupils begin this process during compulsory education when they are between the ages 13 and 16. Over 70% of all young people who enrolled in a VET programme in 2016 managed to find an apprenticeship that matched their desired occupation. This proportion has remained constant over the years.

6 Link Institute (2016).
Creation of a VET programme – An example of cooperation between three main partners

In Switzerland, VET programmes are developed by the private sector, i.e. the professional organisations that represent the interests of economic branches. Every five years, the training content and structure of VET programmes are evaluated from an economic, technological, environmental and didactic standpoint and adapted accordingly.

A new occupation emerges
When a professional organisation wishes to introduce a VET programme for a new occupation, it works closely with the other main partners (i.e. the Confederation and the cantons). An important consideration for federal approval is that learners who graduate from a given VET programme will actually be able to find work. Development of a VET programme takes place in accordance with an established workflow.

First steps
Before work on the new VET programme can start, fundamental questions must first be answered: Which professional organisation will sponsor the new VET programme? Has the occupational field been clarified? Is there a need for the given occupation on the labour market and are there enough companies within the given branch that are willing to create apprenticeship positions and hire graduates afterwards? Once these questions have been answered, the professional organisation will contact the State Secretariat for Education, Research and Innovation SERI and schedule a planning meeting with all of the partners involved.

Competence profile and VET ordinance
The main documents in a given VET programme are the job profile\(^7\), the overview of all professional competences and the statement of the level of difficulty of the given occupation. The VET ordinance includes legal aspects\(^8\) applying to apprenticeship training in dual-track VET programmes as well as the various requirements for practical training within school-based VET programmes.

Consultation and approval
SERI examines the VET ordinance and training plan for quality control purposes. After examination has been completed and any necessary adjustments have been made, SERI organises a consultation session with cantonal agencies, federal agencies and other interested parties. SERI will then take the results of this consultation into account and make whatever changes are needed to the VET ordinance and training plan. Any unresolved issues will be settled in an editing meeting of the various partners. SERI will then issue the VET ordinance and approve the training plan.

Implementation and subsequent modification
The committee for occupation development and quality that is responsible for the given occupation will then meet at least every five years to re-examine the VET ordinance and training plan in view of economic, technological, environmental and didactic developments. Measures may then be taken on this basis to adapt the VET programme accordingly. The Swiss Federal Institute for Vocational Education and Training (SFIVET) has a federal mandate to provide support to the sponsoring professional organisation and the cantons.

---

\(^7\) The job profile describes what the person does in this occupation, his/her field of work and the importance that the occupation has within society.

\(^8\) Subject, duration, objectives and allocation of training content to learning locations, qualification procedure, qualifications and title.
Federal vocational baccalaureate

Issued as a complement to the Federal VET Diploma, the Federal Vocational Baccalaureate (FVB) entitles the holder to enrol in a Swiss university of applied sciences (UAS) without having to take an entrance examination. If an FVB holder also takes the University Aptitude Test (UAT), then enrolment in a cantonal university or one of Switzerland’s two federal institutes of technology (FIT) is also possible.

Proportion of VET graduates who obtained an FVB

The preparatory course for the FVB examination is generally taught by vocational schools. There are two options: either to take this preparatory course alongside the normal training regimen for the given VET programme (FVB 1) or to do so after completion of the VET programme (FVB 2). In recent years, the proportion of VET graduates who also obtain the FVB has been increasing steadily. The number of young people who take the preparatory course for the FVB examination after graduation (FVB 2) has risen at a faster rate than the number of young people who choose the FVB 1 option. The Confederation, the cantons and professional organisations are working closely together to consolidate the Federal Vocational Baccalaureate, particularly FVB1.

From federal vocational baccalaureate to a university of applied sciences

UAS offer a combination of theory and practical training at tertiary level. Study programmes lead to a Bachelor’s degree or a Master’s degree. At Bachelor’s degree level, UAS impart general theory and research findings as well as the competences needed to work in a given occupation. At Master’s degree level, UAS provide students with in-depth, specialised knowledge, preparing them for a more advanced qualification in their field. Admission to UAS is generally open to holders of the FVB.

¹⁰ Fields of study that are unrelated to any VET programme are not listed (sports, music, theatre and other arts, applied linguistics, applied psychology).

The University Aptitude Test (UAT), which may be taken by holders of the Federal Vocational Baccalaureate, enables one to enrol in any study programme at a Swiss university (i.e. cantonal universities and the two federal institutes of technology). The preparatory course for the UAT takes a year. This option has become increasingly popular in recent years.

**Information about UAT:**

[www.sbfi.admin.ch/passerele-d](http://www.sbfi.admin.ch/passerele-d)
Swiss tertiary-level education is comprised of professional education, universities of applied sciences (UAS) and cantonal universities/federal institutes of technology (FIT). The professional education sector places great emphasis on the actual skills used in a given profession.

Transitions to professional education

Professional education imparts competences needed to handle challenging technical or managerial activities and provides the labour market with highly skilled workers. Admission to professional education is normally open to holders of a Federal VET Diploma or equivalent upper-secondary level qualifications. The proportion of holders of vocational qualifications who, after some years of work experience, decide to pursue professional qualifications has increased slightly in recent years.

Pathway leading to professional qualifications

Most people obtain their professional qualification after having passed a federal examination. The federally regulated professional education sector accounted for over 90% of the qualifications awarded in Switzerland in 2015.

In Switzerland, there are federal examinations at level 1 for around 220 different professions and at level 2 for around 170 different professions. Both levels combined, the ten most frequently taken examinations accounted for 40% of all federal examinations taken in 2015.

In Switzerland, there are study programmes available at colleges of higher education for around 450 different occupations. The ten most frequently completed study programmes accounted for over 60% of all study programmes completed in 2015.

Holders of tertiary-level professional qualifications are more likely to work for small-sized companies on a contractual basis whereas holders of higher education qualifications tend to work for larger-sized companies.

In terms of employment position, there does not seem to be any significant difference between holders of professional qualifications and holders of higher education qualifications.

Distribution of holders of tertiary-level qualifications by company size

Holders of tertiary-level professional qualifications are more likely to work for small-sized companies on a contractual basis whereas holders of higher education qualifications tend to work for larger-sized companies.

In terms of employment position, there does not seem to be any significant difference between holders of professional qualifications and holders of higher education qualifications.

FTE= Full-time equivalent

Income from employment by vocational/professional qualification\textsuperscript{17}

Professional education offers a good return on investment for qualification holders. Most students enrolling in preparatory courses for federal examinations or study programmes at colleges of higher education do so on a part-time basis while working and therefore already earn an income that increases once they obtain their tertiary-level professional qualification. Compared to holders of upper-secondary level vocational qualifications, holders of professional qualifications earn about one-third more.

Transition from professional education to a university of applied sciences

It is possible to transition from professional education to a Swiss university of applied sciences. Depending on the qualifications, holders of professional qualifications may be admitted to a Swiss UAS without having to take an entrance examination or after passing an admissions test.

Vocational qualifications for adults

In Switzerland, adults may also seek vocational qualifications. Adults may either attend the standard dual-track VET programme leading to issuance of a vocational qualification or obtain this qualification through direct admission to the final examination. A third option is to obtain their qualification through the validation of non-formal and informal learning (VNIL).

Four established pathways to vocational qualifications

For adults, there are several ways to obtain a Federal VET Certificate or a Federal VET Diploma. The first two pathways to vocational qualifications consist of enrolment in a shortened or standard dual-track VET programme. The other two involve direct admission to the final examination or validation of non-formal and informal learning (VNIL).

Special conditions for adults with work experience

The shortened dual-track VET programme, direct admission to the final examination and VNIL were all developed specifically for adults who have already gained a certain amount of work experience. Therefore, past knowledge and know-how can be taken into account. For direct admission to the final examination, the person must have at least five years of work experience. While direct admission to the final examination is possible for all occupations, the VNIL option is only available for a limited number of occupations.

Choice of pathway

Young adults tend to choose the first two options, enrolling either in a shortened or standard dual-track VET programme. Adults aged 25 and older tend to prefer preparation for direct admission to the final examination. VNIL is the preferred option for older adults.

18 Federal Statistical Office (2016h), special analysis.
Swiss VPET funding

The VPET sector is funded by the Confederation, the cantons and professional organisations, each to its own extent. Most of the costs of professional education and job-related CET programmes are borne by companies and private individuals.

Public sector
Public expenditure for Switzerland’s VPET system stood at around CHF 3.5 billion in 2015. The cantons are responsible for implementing VPET. As such, they cover at least three-fourths of associated costs. The Confederation’s share of public funding of the VPET system corresponds to one-fourth of the total costs. A total of 10% of federal funding will be used to promote VPET development projects as well as specific activities that serve the public interest.

Private sector
Professional organisations provide both services and funding for the Swiss VPET system: they do the groundwork, run their own training centres and promote specific occupations (VET sector) and professions (professional education sector). For their part, companies help to fund the system by creating apprenticeship positions.

VET sector
Professional education sector

Share of total public expenditure for VPET system

19 State Secretariat for Education, Research and Innovation (2016).
Funding of VET sector
Upper-secondary level vocational education and training (VET) is both publically and privately funded. Public funding comes from the cantons, the Confederation and the communes. Private funding comes from host companies as well as professional organisations. Generally speaking, host companies stand to benefit from taking part in VET programmes. According to a cost/benefit study conducted in 2009, gross costs of involvement in VET amounted to CHF 5.3 billion. This figure was outweighed by the productive output generated by apprentices, which amounted to CHF 5.8 billion.

Cost/benefit ratio for Swiss companies involved in VET programmes, survey year 2009

![Table showing cost/benefit ratios for different VET programmes](image)

VPET funds
All companies within a given economic branch are required to contribute to a corresponding VPET fund, which is used to cover the costs of activities within the VET sector and professional education sector (e.g. development of training programmes, organising courses and qualification procedures, promotion of specific occupations). The Confederation may declare some VPET funds to be of general interest and therefore mandatory for all companies within a given economic branch.

Costs and benefits by duration of training, in CHF

![Graph showing costs and benefits by duration of training](image)

21 Füehner M. and Schweri J. (2010).
Funding of professional education sector
Unlike the upper-secondary level VET sector, the tertiary-level professional education sector relies much more heavily on funding from students and employers. Federal examinations in particular and the corresponding preparatory courses are mostly paid for by the private sector. Nevertheless, the public sector contributes substantial funding. In 2015, public expenditure for professional education and job-related continuing education and training (CET) exceeded CHF 460 million.

Federal examinations
60% to 80% of the costs of conducting federal examinations is paid for by the Confederation. In 2015, this amounted to around CHF 30 million. Most individuals who attend preparatory courses for federal examinations do so on a part-time basis while remaining in employment. These preparatory courses are not regulated by the state and are only partially funded by the public sector. According to a study conducted in 2010, most of the associated costs are paid for by the private sector (employers, students). The amount contributed by employers is agreed upon on a case-per-case basis in discussions with their employees.

Colleges of higher education
Since the 2015/2016 school year, public funding for study programmes at Swiss colleges of higher education is provided by the cantons under the terms of an Intercantonal Agreement on Funding Contributions for Study Programmes at Colleges of Higher Education (HFSV). The cantons pay the colleges of higher education lump sum contributions per student up to a maximum of 50% of the average costs of each study programme. When a given study programme is particularly important to the general public (e.g. health), then cantonal contributions can be as high as 90% of the average costs. The remaining costs are covered by tuition.

VPET at international level

The internationalisation of education and labour poses challenges for the Swiss system of vocational and professional education and training (VPET). Switzerland has therefore taken active steps at multiple levels to address this phenomenon. With the aim of further strengthening the position of Swiss dual-track VET programmes, the State Secretariat for Education, Research and Innovation (SERI) is taking corresponding measures in coordination with the cantons and professional organisations.

International cooperation in vocational education and training (IC-VPET)
The main thrust of the strategy for international cooperation in vocational and professional education and training (IC-VPET) is to support the following: international recognition of vocational and professional qualifications, transfer of expertise, maintaining the high quality of the Swiss VPET system within an international context and encouraging the international mobility of those who are active within the VPET system. In addition to these objectives, the strategy also establishes priorities, measures and criteria for IC-VPET.

Transfer of expertise
The Swiss VPET system has generated international interest. Switzerland receives foreign delegations, shares its expertise with interested countries in accordance with the IC-VPET strategy and works closely with countries that also have strong dual-track VET systems. Projects and measures pursued by Swiss partners in the area of international cooperation in vocational education and training (IC-VET) qualify for subsidiary support from the State Secretariat for Education, Research and Innovation (SERI). Scheduled to take place in Winterthur from 6-8 June 2018, the 3rd International Congress on Vocational and Professional Education and Training will serve as a platform for open dialogue and the exchange of good practices between IC-VPET actors.

EU education programmes
Switzerland indirectly takes part in EU education and youth programmes (Erasmus+). Among other things, this includes funding for mobility and cooperation activities in the area of VPET.

National Qualifications Framework (NQF VPET)
The Swiss National Qualifications Framework for Vocational and Professional Qualifications (NQF VPET) makes it easier to compare and appreciate the value of Swiss vocational and professional qualifications at the international level. In the future, all vocational and professional qualifications will be assigned to a level within the NQF VPET. In addition, each VET qualification will be accompanied by a corresponding certificate supplement and each professional education qualification with a corresponding diploma supplement. These documents explain the competences acquired by the qualification holder and will be available in Swiss national languages and English.

Recognition of foreign vocational and professional qualifications
SERI recognises foreign upper-secondary level vocational and tertiary-level professional qualifications. Recognition makes it easier for holders of foreign qualifications to work in occupations or professions that are regulated in Switzerland, thereby facilitating integration on the Swiss
labour market. In most cases, recognition is based on a comparative analysis of the content and structure of training in the country where the foreign qualification was issued. This is done to determine whether the foreign qualification is equivalent to a Swiss one. Any significant discrepancies can be overcome by means of compensatory measures. SERI works closely with Swiss professional organisations and training institutions, which helps to ensure a high level of acceptance of recognition decisions.

Pursuing international cooperation in VET through international organisations
Cooperation with international organisations such as the OECD or the EU fosters an understanding of VET at international level. The State Secretariat for Education, Research and Innovation (SERI) represents Switzerland in various European bodies in matters pertaining to VET. This has enabled Switzerland to present its positions and exchange good practices. This cooperation has led to international VET projects.

SwissSkills, EuroSkills and WorldSkills competitions
Each year, numerous trade associations choose who among their professionals will represent them at the SwissSkills competition, which also serves as the selection round for those who will represent Switzerland at EuroSkills and WorldSkills competitions. The next WorldSkills Competition will be held in Abu Dhabi in 2017. On the agenda in 2018 are SwissSkills, the Swiss skills competition, which will again be held in Bern, and EuroSkills, which will take place in Budapest.

23 In relation to transitional measures for Erasmus+ in 2016 (based on Federal Council proposal for compensatory budget to cover period 2015/16).
VPET research

The Swiss VPET system is an important asset for the Swiss economy and strengthens its international competitiveness. Subsequent development and adaptation of the VPET system to fresh challenges requires knowledge, which can be gained through VPET research.

**Legal mandate**
The Federal Vocational and Professional Education and Training Act (VPETA) states that the Confederation must contribute to the development of the Swiss VPET system through VPET research, among other things. Quality and independence must be assured through qualified research institutes.

**Objectives**
The Confederation will continue to support VPET research until a lasting infrastructure is in place that conducts research to an internationally recognised standard. VPET research findings should enable continuous development of the Swiss VPET system. In addition, research findings should produce the knowledge needed to manage Swiss VPET policy. Together with funding of projects aimed at developing the VPET system and support for special services, federal VPET research constitutes a viable means of ensuring innovation within the VPET system.

**Support instruments**
The support programme sponsored by the State Secretariat for Education, Research and Innovation (SERI) is comprised of two support instruments: «Leading Houses» and «Individual projects». Both of these instruments complement one another. The Leading House instrument pursues long-term objectives with the aim of establishing new research structures. Leading Houses focus on clearly defined, relevant research themes. In their respective areas, each Leading House acts as a competence centre. In contrast, individual projects pursue shorter-term objectives and generally last for a period of up to four years. With these two instruments, it is possible to conduct both fundamental and applied research in support of the VPET system.
